

Meet Ellen.
And meet up
to 85%* savings
on lab work.

Hi, I'm Ellen. After my last checkup, my doctor was concerned I might be anemic. She wanted me to get some blood work done to check my iron levels. I started to make an appointment at the lab right in my doctor's office. But then I remembered I could save up to 85%* on lab services by using LabCorp or Quest. Now, whenever I need lab work – whether it's for my iron, my thyroid or even a test for strep throat – I ask my provider to send me to LabCorp or Quest. With locations nationwide, it's a convenient way to save.

To find a LabCorp or Quest near you, go to myCigna.com[®] or call the toll-free number on your ID card.

* Savings based on average Quest/Labcorp costs compared to labs done at other ancillary, outpatient hospital and non-par labs. These values are based on the top utilized reference laboratory tests in 2022.
